

Junior High Course

The 3200 meter course is made up of one large loop and a spur to the finish line on the track. From the start, turn right and go around the cornfield. The junior high course will have a loop that spurs into the start area and then returns to the larger outer loop, north of the starting line. From there, you will finish the outer loop. When you reach the start area, you will follow the fence along the starting line and run the spur to the finish line on the track.
