

High School 5k course

Notes and tweaks: We added a new creek crossing to avoid head to head traffic and allow us a larger loop which should eliminate lapped traffic. I think everyone will like the new crossing. It adds variety. Finally, we cleared behind the row of pines on the 3rd base side of the soccer fields so we aren't running side by side in opposite directions. This also eliminated the ugly area of running through the softball concession stand. Finally, this allowed us to run more inside the stadium to finish. This surface is all redone this year and is amazing to run on. It makes the course much more spectator friendly for those watching the finish in the stands.
