RE: Athletic training coverage

The athletic training staff will provide visiting teams, traveling without a licensed athletic trainer/team physician, with first aid and emergency coverage. We cannot make return to participation decisions for visiting student/athletes nor do we expect your athletic training staff to make these decisions for our student/athletes. Without a referral, by law we cannot provide taping or special equipment, which may be required for participation or return to participation.

Any visiting athlete needing to be taped and/or requiring any special attention prior to a contest will be done if provided with proper documentation from an athletic trainer (for prophylactic care) or physician (prescribed care). The visiting team's athletic trainer should contact our staff, in advance to facilitate any special arrangements and provide any necessary supplies.

Please feel free to contact me at 614-600-8887 with any questions.
