

Baumspage Wrestling Application

Add or Split Weight Classes

Revised: 02-02-2023

To Add or Split Weight Classes:

1. Use **Event Setup | Adjust Seeding/Scoring Settings**

The screenshot shows the 'Event Setup' interface. The 'Adjust Seeding/Scoring Settings' section is highlighted. The 'Tournament Type (Scoring Rules):' is set to 'Pool Tournament (16 teams based)'. The 'Valid Weight Classes(csv)' field contains the text: '106,113,120,126,132,138,144,150,157,165,175,190,215,285'. The 'Award Places:' field is empty.

2. Edit **Valid Weight Classes(csv)**
 - a. Insert the new weight class or classes and a comma in the weight class list.
 - b. You may use a **decimal** to designate the added weight or **add 1 pound**.
106,113,120,126,132,**132.1**,138,144,**144.1**,150,157,165,175,190,215,285
 - c. **Be careful! Do not add any blank spaces!**
 - d. Hit **[Enter]** to save
 - e. Click **OK** on the "... changed valid weight classes list, **APP MUST refresh NOW.**"
3. The weight class table will not reflect the new classes until wrestlers are assigned to it.
 - a. Click **Select Team** to edit the roster.
 - b. Add them to the regular roster if they are going to be a scoring wrestler.
 - c. Or **Add** a weight class at the bottom, to make them a non-scoring participant.
4. When all rosters are corrected:
 - a. Check the "**Team Lists & Rosters are all corrected. I'm ready to Seed & Draw!**" box.
 - b. Click **Generate Extra Teams/Seed & Draw Matches**
